FAQS

TESTING PARAMETERS

CHARACTERISTICS	INSPECTION STANDARDS	VALUE
Appearance Standards	Inspection (no dense dust, flow lines, lack of oil, scars, scratches, extrusion vibration lines, black spots, other garbage, etc.)	Compliant with building material grade appearance
Coating Adhesion	Cross-hatch cutter test: 3M600 tape test 5 times	5B
Light Transmittance	(ASTM D1003) ≥ 90%	90.50%
Haze	(ASTM D1003) ≤ 0.5%	0.03%
Hardness	(ASTM D3363) Mitsubishi Pencil 750g	5/5 No long scratches
Boiling Water- Resistant	100 °C, Uniform Haze and Adhesion ≥ 4B	5B
Water Drop Test	Contact Angle (≥ 90°)	96°
Scratch Resistant	Use nails to take the edge of the paint line and scrape it on the coating for testing (no powdering)	No Powder

PANEL STRUCTURE

CLEANING & MAINTENANCE

- Do not place hot cookware or hot objects directly on the laminate surface.
- Do not use paint thinner, acetone, or other harsh cleaning agents.
- Avoid alcohol-based, solvent-based, petrol-based, pinewood oil, or other oil-based cleaners.
- Do not use abrasive cloths, scrubbers, or anything other than micro fiber cloths.
- Do not expose the laminate to high temperatures as it may damage or deform the surface.
- Wipe spills immediately to prevent staining or damage.

CUTTING & INSTALLATION

- Can be cut using standard woodworking tools
- Use acrylic-to-wood adhesives (readily available in the market)
- Clean both laminate and base with a soft brush or cloth before application
- Press from center outward toward edges and corners for proper adhesion
- Apply consistent pressure for at least 15 hours to ensure strong bonding
